## WHAT YOU CAN EXPECT FROM US

Econometrica's approach to project management begins with client relationships. You – our client – become an integral part of the project team to ensure that emphasis is given to your unique needs. Our goals are to provide you with:

- The most highly-qualified people to staff your project and ensure that you get the results you want – on time and within budget.
- A single, responsible contact within our firm for each project.
- Intensive hands-on oversight from our top management for each account.

We are known for bringing together a corps of exceptionally well-trained experts from a wide range of disciplines and pragmatic experiences. Their advanced educational and professional qualifications enable us to offer you top quality services. If your project requires additional specialized expertise, we draw upon highly seasoned professionals to augment our staff. Our overriding goal is to provide you always with the best talent for your individual project needs.

## PLANNING, EVALUATION & ANALYSIS EXPERTISE WE CAN OFFER YOU

Econometrica offers a full range of support services to AHRQ in health-related planning, evaluation and analysis activities. These include the services listed below:

**Program evaluation:** We can provide evaluation design studies and program/product evaluations that require a range of methodologies, including case studies, network analysis, and innovative techniques.

**Economic, cost-benefit, and other types of cost-related analyses:** We can perform highly quantitative analyses, including original data collections as required, that will help to determine the impact of Agency efforts and the relative benefit to be derived from the implementation of Agency findings/recommendations.

**Legal and policy analyses:** We can provide legal and policy analyses to summarize and/or analyze legislative or regulatory issues affecting system delivery, health policies, or the implementation of health reforms—such as studies of insurance or anti-trust issues, public/private partnerships, technology translation of Agency-funded research, medical liability, workers compensation, disability law, etc.

**Actuarial analyses and related types of studies:** We can estimate and project the effects of market changes and new policies across populations and care delivery systems, including specialized analysis of data sets and the application of actuarial estimating techniques.

**Customer satisfaction surveys and other information collection efforts:** We can plan, design, and carry out consumer satisfaction surveys and focus groups to determine the effects of Agency activities and to identify areas of interest for future work, as well as helping to further the science of health care consumer satisfaction surveys as a medium for measuring attitudes toward health care services.

**Internal management and organizational studies, strategic planning and performance measurement:** We can carry out management and strategic planning studies that will enable your organization to better manage its resources, target its resources to achieve agreed-upon future goals, and maximize its expenditures, with the goal of adopting and maintaining a relevant, logical, feasible, and efficacious course for the future.
