WHAT YOU CAN EXPECT FROM US

Econometrica's approach to project management begins with client relationships. You – our client – become an integral part of the project team to ensure that emphasis is given to your unique needs. Our goals are to provide you with:

- The most highly-qualified people to staff your project and ensure that you get the results you want – on time and within budget.
- A single, responsible contact within our firm for each project.
- Intensive hands-on oversight from our top management for each account.

We are known for bringing together a corps of exceptionally well-trained experts from a wide range of disciplines and pragmatic experiences. Their advanced educational and professional qualifications enable us to offer you top quality services. If your project requires additional specialized expertise, we draw upon highly seasoned professionals to augment our staff. Our overriding goal is to provide you always with the best talent for your individual project needs.

PROGRAM SUPPORT CENTER ID/IQ TASK ORDER CONTRACTS

Econometrica offers a full range of support services to help agencies achieve their missions in a timely manner:

Policy Assessments/Analysis: Perform analyses of major policy issues that contribute to internal debate on budgetary, legislative, and program modification decisions; provide background analysis and support for major initiatives; produce information bases for congressionally mandated reports.

Program Assessments: Perform detailed program assessments to define issues or problems; identify “best practices” in program sites; produce preliminary data on efficiency and effectiveness; recommend options for program change and subsequent evaluation.

Evaluation Design Studies and Data Collection: Propose technical designs for program evaluations; test designs by collecting data on program performance; produce results for use by program managers and policymakers in selecting designs for full-scale evaluations if needed.

Performance Measurement: Assist agencies in meeting requirements under the Government Performance and Results Act (GPRA), including redesign and improvement of performance measurement processes.

Technical Assistance/Expertise: Provide a broad range of technical assistance to meet specific organizational requirements, including: assess and assist in program areas; improve internal management and financial systems; interpret audit reports; install or improve project-specific quality assurance systems.

Data Analysis: Perform simple or complex analyses of federally supplied and public-access data, including: cross-tabulations; reliability and validity calculations; sample selection; power analyses; trends and projections; sample size calculations; and preparation of narrative materials, graphs, charts, overheads, and PowerPoint demonstrations for clearance and distribution.

Auxiliary/Support Services: Provide support for the activities described above, including: translation and interpretation services; web site design and maintenance; publication production and distribution.
